Forecast for Friday 24 Jun 2022

Weather: Starting with sunny spells for many areas. However, the clouds will soon bubble up and scattered showers will develop, which will be heavy and thundery, with lightning and the risk of hail additional hazards, from late-morning and into the afternoon. The showers or thunderstorms should gradually ease late afternoon, with some late brightness developing, before a narrow band of mainly light rain arrives from the west this evening.

Chance of cloud-free hill tops above 600m: Generally 90% throughout, but decreasing to 60% at times, in heavy showers and thunderstorms, and later with the rain band.

Low cloud and visibility: Visibility will be very good with distant hills clearly visible and cloud is expected to remain above the summits, even in the heavy showers and thunderstorms. Visibility may lower to moderate or poor in any heavier showers or thunderstorms during today.

Meteorologist's View

UV levels will be Moderate to High when sunny spells occur, and therefore good sun protection is recommended. Sudden downpours are possible from late-morning and this afternoon with lightning, hail and gusty winds possible additional hazards. Thin waterproof layers recommended, and be ready to descend off exposed and steep terrain during any heavy thundery downpours.

Forecast for Saturday 25 Jun 2022

Weather: A band of mainly light rain will quickly clear, with drier and clearer conditions following. After a dry and bright start initially, showers will soon break out from late-morning and into the afternoon. The showers will be heavy at times, but with a lower risk of thunder and lightning, with sunnier spells in-between the showers. Feeling cooler and fresher compared to recent days.

Maximum wind: South to southwesterly 15-20mph, occasionally gusting 30-35mph.

Chance of cloud-free hill tops above 600m: 90% chance throughout, lowering to 60% in the heavier showers.

Low cloud and visibility: Visibility will be very good with distant hills clearly visible and cloud is expected to remain above the summits, even in the showers. Visibility may lower to moderate or poor in any heavier showers during the day. However, the showers will be moving through fairly quickly, with any reductions in visibility likely to be short-lived.

Temperature: **Valleys:** Plus 13 Celsius, becoming Plus 18 Celsius.
At 600m: Plus 8 Celsius, becoming Plus 12 Celsius.
Freezing level: Above the summits.
